Subjects

AIRCRAFT DESIGN AND TECHNOLOGY

Japan keeps abreast of U.S. technology, Jan., p. 12.
Radar combat and the illusion of invincibility, Jan., p. 14.
Many merge to NASP, Feb., p. 32.
Stealth technology goes to combat in Panama, Feb., p. 6.
Stealth comes of age, March, p. 16.
ATF: Can one aircraft serve two masters? March, p. 6.
Sukhoi and Gulfstream go supersonic, April p. 40.
HTTB: Industry's first STOL test bed, April p. 34.
Eurofighter faces questions on future, May, p. 31.
Aircraft engine technology gets a second wind, July, p. 36.
Power plants the key to "son of Concorde," July, p. 20.
CFD propels NASA propulsion progress, July, p. 26.
Turbofans turn to UHB propulsion, July, p. 32.
The challenge of demonstrating the X-30, July, p. 22.
Army's light helicopter is in the spotlight, Aug., p. 14.
Supersonic STOVL: The future is now, Aug., p. 18.
X-31 will turn on a dime, Oct., p. 26.
The upside-down air force, Nov., p. 30.
Aerospace '90: Aeroacoustics, Dec., p. 35.
Aerospace '90: Flight simulation, Dec., p. 27.
Aerospace '90: Flight testing, Dec., p. 18.
Aerospace '90: Lighter than air, Dec., p. 19.
Aerospace '90: Ground testing, Dec., p. 26.
Aerospace '90: Structures, Dec., p. 14.
Aerospace '90: VSTOL, Dec., p. 36.
Aerospace '90: General aviation, Dec., p. 45.
Aerospace '90: Air transportation, Dec., p. 24.
Aerospace '90: Aircraft design, Dec., p. 48.
Aerospace '90: Applied aerodynamics, Dec., p. 41.

AVIONICS AND ELECTRONICS

Radar combat and the illusion of invincibility, Jan., p.14.
Design overview, Feb., p. 15.
NASA/NBS reference model, Feb., p. 21.
NASA's first dexterous space robot, Feb., p. 12.
Evolution and advanced technology, Feb., p. 23.
FTS operations, Feb., p. 20.
JSTARS in the European skies, Feb., p. 26.
A revolution in advanced guidance systems is coming, Oct., p. 16.
Where two frontiers meet, Oct., p. 20.
Simulators will help pick the LH winner, Nov., p. 26.
The upside-down air force, Nov., p. 30.
Aerospace '90: Guidance, navigation, and control, Dec., p. 21.
Aerospace '90: Sensors, Dec., p. 32.
Aerospace '90: Digital avionics, Dec., p. 76.

COMMUNICATIONS

Communicating with Voyager, May, p. 18.
Aerospace '90: Communications, Dec., p. 68.

COMPUTERS AND SOFTWARE

Battle management by computer, Jan., p. 24.
Simulations "picture" IR scenes, Jan., p. 20.
FTS operations, Feb., p. 20.
Computer graphics aid mission operations, April p. 28.
A new picture of the battlefield, May, p. 24.
From the classroom to the war room, May, p. 26.
CFD propels NASA propulsion progress, July, p. 26.
Computers start to see the light, Aug., p. 42.
Simulation helps Sweden into space, Oct., p. 34.
Aerospace '90: Computer systems, Dec., p. 66.
Aerospace '90: Interactive comupter graphics, Dec., p. 71.
Aerospace '90: Software, Dec., p. 42.
Aerospace '90: Artificial intelligence, Dec., p. 17.
Aerospace '90: C^{3}I, Dec., p. 38.
Aerospace '90: CAD/CAM, Dec., p. 53.

EDUCATION

A glimpse of Soviet aerospace education, March, p. 10.
Education and world leadership, April p. 5.

INSTRUMENTATION AND TECHNOLOGY

3D laser copying, Jan., p. 40.
Evolution and advanced technology, Feb., p. 23.
JSTARS in the European skies, Feb., p. 26.
Solving connection problems with magnets, Feb., p. 48.
New light on wind tunnel lasers, April p. 44.
Cats give lasers wings, May, p. 32.
Breaking ground for the Earth sciences, June, p. 27.
Getting out the data, June, p. 33.
U.S. Polar Orbiting Platform: Instruments by the score, June, p. 29.
New focus for technology push, June, p. 31.
Catch a falling star, June, p. 42.
Aircraft engine technology gets a second wind, July, p. 36.
Turbofans turn to UHB propulsion, July, p. 32.
Hubble's optics are crippled, Aug., p. 7.
Aerospace '90: Aerodynamic measurement technology, Dec., p. 37.
Aerospace '90: Aerodynamic decelerators, Dec., p. 20.
Aerospace '90: Multidisciplinary design optimization, Dec., p. 65.
Aerospace '90: Space operations and support, Dec., p. 55.
Aerospace '90: Survivability, Dec., p. 16.
Aerospace '90: Aerospace maintenance, Dec., p. 78.
Design engineering, Dec., p. 51.

INTERNATIONAL

Japan keeps abreast of U.S. technology, Jan., p. 12.
Europe moves to integrate ATC systems, Jan., p. 10.
Breaking the ice in Ann Arbor, Feb., p. 7.
Soviet Union launches mission to market, Feb., p. 10.
Lunar *glasnost*, Feb., p. 40.
Eastern Europe turns the world upside down, March, p. 5.
Airbus flies through stormy weather, April p. 14.
Sukhoi and Gulfstream go supersonic, April p. 40.
Eurofighter faces questions on future, May, p. 31.
Commercial space cooperation crystallizes, June, p. 20.
Big changes in Soviet space bureaucracy, June, p. 18.
Reusable space systems and international cooperation, June, p. 36.
Juno mission hits funding snags, June, p. 23.
Europe sets timetable for ATC integration, Aug., p. 17.
The Columbus program and Freedom, Sept., p. 31.
Freedom is an international partnership, Sept., p. 20.
Soviet space factions compete for dwindling funds, Sept., p. 12.
After the cold war—peace dividend or deficit? Sept., p. 18.
International antecedents, Sept., p. 23.
Canada's critical role in Freedom, Sept., p. 25.
Japan gets manned space experience, Sept., p. 36.
High technology moves to the Persian Gulf, Oct., p. 13.
Europe's key space programs face scrutiny, Oct., p. 15.
Fewer, bigger firms in Europe's new look, Nov., p. 16.

MANAGEMENT

Airbus flies through stormy weather, April p. 14.
Aerospace '90: Management, Dec., p. 58.
Aerospace '90: Systems effectiveness and safety, Dec., p. 62.
Aerospace '90: Technical information, Dec., p. 78.

MATERIALS

Material of the '90s? Jan., p. 28.
Materials get smarter, March, p. 30.
Stealth comes of age, March, p. 16.
Industry turns to ceramic composites, March, p. 22.
Catch a falling star, June, p. 42.
Ceramics learn to bend instead of break, Aug., p. 24.
Gelatin with a bang, Sept., p. 44.
Push-button solids, Nov., p. 34.

MILITARY SYSTEMS

A new picture of the battlefield, May, p. 24.
From the classroom to the war room, May, p. 26.
Washington digest, July, p. 14.

MISSILES

From "smart rocks" come "Brilliant Pebbles," April p. 18.
SDI thinks small, April p. 22.
Ramjets experience renewed interest worldwide, July, p. 28.
Aerospace '90: Missiles, Dec., p. 56.

POLICY

Europe moves to integrate ATC systems, Jan., p. 10.
Radar combat and the illusion of invincibility, Jan., p. 14.
Defense budget: up for grabs, Jan., p. 5.
Washington digest, Jan., p. 6.
A national space policy for the 21st century, Feb., p. 5.
NATO seeks new role as cold war thaws, March, p. 12.
ATF: Can one aircraft serve two masters? March, p. 6.
NASA gets a late Christmas present, March, p. 9.
Washington digest, April p. 6.
We need "America's Launch System," May, p. 4.
What price Freedom? May, p. 12.
Commercial space cooperation crystallizes, June, p. 20.
The propulsion challenge, July, p. 6.
Too much heat, too little light in Middle East, Oct., p. 4.
New directions for the Pentagon, Nov., p. 14.
Aerospace '90: Support systems, Dec., p. 59.
Aerospace '90: Legal aspects, Dec., p. 29.

PROPULSION AND POWER

Into space electrically, March, p. 48.
SDI thinks small, April p. 22.
Advanced propulsion on a shoestring, May, p. 14.
Ramjets experience renewed interest worldwide, July, p. 28.
Advanced space propulsion, July, p. 60.
Solid rocket motors aim for deep space, July, p. 48.
Aircraft engine technology gets a second wind, July, p. 36.
Combustion faces environmental challenges, July, p. 52.
U.S. liquid propulsion technology stands still, July, p. 40.
Electric propulsion as a national capability, July, p. 56.
Power plants the key to "son of Concorde", July, p. 20.
Solid rocket technologies for the 21st century, July, p. 44.
CFD propels NASA propulsion progress, July, p. 26.
The propulsion challenge, July, p. 6.
Turbofans turn to UHB propulsion, July, p. 32.
The challenge of demonstrating the X-30, July, p. 22.
Aerospace '90: Electric propulsion, Dec., p. 50.
Aerospace '90: Liquid propulsion, Dec., p. 70.
Aerospace '90: Propellants and combustion, Dec., p. 34.
Aerospace '90: Solid rockets, Dec., p. 73.
Aerospace '90: Terrestrial energy, Dec., p. 52.
Aerospace '90: Thermophysics, Dec., p. 64.
Aerospace '90: Aerospace power, Dec., p. 13.
Aerospace '90: Air breathing propulsion, Dec., p. 60.

ROBOTICS

Design overview, Feb., p. 15.
NASA/NBS reference model, Feb., p. 21.
NASA's first dexterous space robot, Feb., p. 12.
Evolution and advanced technology, Feb., p. 23.
FTS operations, Feb., p. 20.
A robot to talk with, July, p. 76.
Canada's critical role in Freedom, Sept., p. 25.
Aerospace '90: Space automation and robotics, Dec., p. 23.

International antecedents, Sept., p. 23.
Canada's critical role in Freedom, Sept., p. 25.
Japan gets manned space experience, Sept., p. 36.
High technology moves to the Persian Gulf, Oct., p. 13.
Europe's key space programs face scrutiny, Oct., p. 15.
Fewer, bigger firms in Europe's new look, Nov., p. 16.

MANAGEMENT

Airbus flies through stormy weather, April p. 14.
Aerospace '90: Management, Dec., p. 58.
Aerospace '90: Systems effectiveness and safety, Dec., p. 62.
Aerospace '90: Technical information, Dec., p. 78.

MATERIALS

Material of the '90s? Jan., p. 28.
Materials get smarter, March, p. 30.
Stealth comes of age, March, p. 16.
Industry turns to ceramic composites, March, p. 22.
Catch a falling star, June, p. 42.
Ceramics learn to bend instead of break, Aug., p. 24.
Gelatin with a bang, Sept., p. 44.
Push-button solids, Nov., p. 34.

MILITARY SYSTEMS

A new picture of the battlefield, May, p. 24.
From the classroom to the war room, May, p. 26.
Washington digest, July, p. 14.

MISSILES

From "smart rocks" come "Brilliant Pebbles," April p. 18.
SDI thinks small, April p. 22.
Ramjets experience renewed interest worldwide, July, p. 28.
Aerospace '90: Missiles, Dec., p. 56.

POLICY

Europe moves to integrate ATC systems, Jan., p. 10.
Radar combat and the illusion of invincibility, Jan., p. 14.
Defense budget: up for grabs, Jan., p. 5.
Washington digest, Jan., p. 6.
A national space policy for the 21st century, Feb., p. 5.
NATO seeks new role as cold war thaws, March, p. 12.
ATF: Can one aircraft serve two masters? March, p. 6.
NASA gets a late Christmas present, March, p. 9.
Washington digest, April p. 6.
We need "America's Launch System," May, p. 4.
What price Freedom? May, p. 12.
Commercial space cooperation crystallizes, June, p. 20.
The propulsion challenge, July, p. 6.
Too much heat, too little light in Middle East, Oct., p. 4.
New directions for the Pentagon, Nov., p. 14.
Aerospace '90: Support systems, Dec., p. 59.
Aerospace '90: Legal aspects, Dec., p. 29.

PROPULSION AND POWER

Into space electrically, March, p. 48.
SDI thinks small, April p. 22.
Advanced propulsion on a shoestring, May, p. 14.
Ramjets experience renewed interest worldwide, July, p. 28.
Advanced space propulsion, July, p. 60.
Solid rocket motors aim for deep space, July, p. 48.
Aircraft engine technology gets a second wind, July, p. 36.
Combustion faces environmental challenges, July, p. 52.
U.S. liquid propulsion technology stands still, July, p. 40.
Electric propulsion as a national capability, July, p. 56.
Power plants the key to "son of Concorde", July, p. 20.
Solid rocket technologies for the 21st century, July, p. 44.
CFD propels NASA propulsion progress, July, p. 26.
The propulsion challenge, July, p. 6.
Turbofans turn to UHB propulsion, July, p. 32.
The challenge of demonstrating the X-30, July, p. 22.
Aerospace '90: Electric propulsion, Dec., p. 50.
Aerospace '90: Liquid propulsion, Dec., p. 70.
Aerospace '90: Propellants and combustion, Dec., p. 34.
Aerospace '90: Solid rockets, Dec., p. 73.
Aerospace '90: Terrestrial energy, Dec., p. 52.
Aerospace '90: Thermophysics, Dec., p. 64.
Aerospace '90: Aerospace power, Dec., p. 13.
Aerospace '90: Air breathing propulsion, Dec., p. 60.

ROBOTICS

Design overview, Feb., p. 15.
NASA/NBS reference model, Feb., p. 21.
NASA's first dexterous space robot, Feb., p. 12.
Evolution and advanced technology, Feb., p. 23.
FTS operations, Feb., p. 20.
A robot to talk with, July, p. 76.
Canada's critical role in Freedom, Sept., p. 25.
Aerospace '90: Space automation and robotics, Dec., p. 23.

SPACE AND ATMOSPHERIC SCIENCE

How many habitable planets in the universe? Jan., p. 34.
Phobos: Gains from a loss, Feb., p. 42.
COBE confounds the cosmologists, March, p. 38.
EOS will tell the Earth's story, May, p. 10.
Breaking ground for the Earth sciences, June, p. 27.
Clearing our crystal ball, June, p. 24.
Getting out the data, June, p. 33.
U.S. Polar Orbiting Platform: Instruments by the score, June, p. 29.
Commercial space cooperation crystallizes, June, p. 20.
New focus for technology push, June, p. 31.
Hubble is an observatory out of this world, June, p. 6.
U.S. liquid propulsion technology stands still, July, p. 40.
Sounding rockets explore the ionosphere, Aug., p. 38.
Hubble's optics are crippled, Aug., p. 7.
Where did Venus go wrong? Aug., p. 34.
Exploration in the 21st century: Cassini to Saturn, Oct., p. 30.
Aerospace '90: Marine systems, Dec., p. 40.
Aerospace '90: Plasmadynamics and lasers, Dec., p. 28.
Aerospace '90: Space processing, Dec., p. 74.
Aerospace '90: Space sciences and astronomy, Dec., p. 10.
Aerospace '90: Space systems, Dec., p. 30.
Aerospace '90: Structural dynamics, Dec., p. 44.
Aerospace '90: Life sciences, Dec., p. 54.
Aerospace '90: Astrodynamics, Dec., p. 67.
Aerospace '90: Atmospheric environment, Dec., p. 63.
Aerospace '90: Atmospheric flight mechanics, Dec., p. 12.

SPACE STATION

What price Freedom? May, p. 12.
Energiya looks to Mars and beyond, July, p. 66.
Japan seeks entry in the launch vehicle club, July, p. 70.
Washington digest, July, p. 14.
Ariane 5 aims for the future, July, p. 74.
Is space station assembly too much of a challenge? Sept., p. 4.
The Columbus program and Freedom, Sept., p. 31.
Freedom is an international partnership, Sept., p. 20.
International antecedents, Sept., p. 23.
Canada's critical role in Freedom, Sept., p. 25.
Japan gets manned space experience, Sept., p. 36.
Space station redundancy: changes ahead? Oct., p. 12.
Congress demands a new space station, Dec., p. 6.

SPACE TRANSPORTATION

Shuttling to the space station, March, p. 44.
We need "America's Launch System", May, p. 4.
Reusable space systems and international cooperation, June, p. 36.
Energiya looks to Mars and beyond, July, p. 66.
Japan seeks entry in the launch vehicle club, July, p. 70.
Ariane 5 aims for the future, July, p. 74.
Humans to Mars in 1999, Aug., p. 30.
Zenith Star launch system, Sept., p. 40.
The Personnel Launch System, Nov., p. 18.
The Soviet race to the Moon, Nov., p. 22.
Aerospace '90: Space transportation, Dec., p. 72.

SPACECRAFT

Lunar glasnost, Feb., p. 40.
Phobos: Gains from a loss, Feb., p. 42.
COBE confounds the cosmologists, March, p. 38.
NASDA develops large satellites for H-II, April p. 16.
Communicating with Voyager, May, p. 18.
Advanced space propulsion, July, p. 60.
Solid rocket motors aim for deep space, July, p. 48.
Electric propulsion as a national capability, July, p. 56.
Simulation helps Sweden into space, Oct., p. 34.
Exploration in the 21st century: Cassini to Saturn, Oct., p. 30.
Magellan is also blessed with luck, Nov., p. 4.

STRATEGIC DEFENSE INITIATIVE

Battle management by computer, Jan., p. 24.
From "smart rocks" come "Brilliant Pebbles," April p. 18.
SDI thinks small, April p. 22.
Are Brilliant Pebbles all that brilliant? Dec., p. 6.

FACE TO FACE

With Richard Truly, May, p. 8.
With Lew Allen, June, p. 10.
With Hans Pabst von Ohain, July, p. 8.
With Robert Roe, Aug., p. 8.
With James B. Busey IV, Sept., p. 6.
With Norman R. Augustine, Oct., p. 8.
With Ben Rich, Nov., p. 6.

A LETTER FROM

Edwards Air Force Base, June, p. 14.
Jet Propulsion Laboratory, July, p. 10.
Boeing, Aug., p. 10.
Kennedy Space Center, Sept., p. 10.
Ames Research Center, Oct., p. 8.
Rolls-Royce, Nov., p. 10.
